Guide to Add New IPs to Whitelist of Routers

1. If your router doesn't have a firewall in place and does not have a whitelist, please ignore the contents of this document. This migration will not have any impact on your use of iSolarCloud.
2. If your router's built-in firewall is enabled, please refer to the following to add new IPs to the whitelist.
 - a. If your router firewall supports the second level domain (SLD), please refer to the following to whitelist of your router.

Functionalities	Released addresses	Open Ports
Domain Name	https://*.isolarcloud.eu https://*.isolarcloud.com	TCP:16000~20000 TCP: 80、443 TCP: 8443、8448
FTP Server	3.127.139.154 (Needs to be added)	TCP:21 FTP TCP:20002 SFTP TCP:80、443 FTP

- b. If your router's firewall does not support a second-level domain, but it does support the configuration of the domain name, please refer to the following to whitelist of your router.

Functionalities	Released addresses	Open Ports
Domain Name	api.isolarcloud.eu	TCP:16000~20000
	iot.isolarcloud.eu	TCP:16000~20000
	euiot.isolarcloud.com	TCP:16000~20000
	web2.isolarcloud.eu	TCP:80 TCP:443
